

# SilPruf\* NB SCS9000

## Non-Staining Silicone Sealant

SilPruf NB is an elastomeric joint sealant designed to seal natural stone, composite metal panel and glass substrates. Its non-stain technology can eliminate or reduce staining and residue retention to help maintain the long-term aesthetic appearance of a project.

### Typical Benefits:

- **Durable 100% Silicone** - Provides a durable, weather seal without the need for a surface modifier. 20 year warranty available.
- **Non-Staining** - Eliminates or reduces sealant fluid migration onto sensitive substrates.
- **Low Dirt Pick-Up** - Reduces residue rundown for composite metal panels, curtain wall and glass facades.
- **High Performance** - Provides +/- 50% joint movement.
- **Watertight** - Provides a watertight seal.
- **Long Work Life** - 30 minutes tooling time.

**Standard Colors:** White, black, limestone, light grey, aluminum grey, dark grey, precast white, and bronze. Custom colors available.

### Packaging:

10.1 oz. Cartridges, 20 oz. Sausage Packs and 2 Gallon Pails.

### Specifications:

ASTM C920, Type S, Grade NS, Class 50, Use A, G, M & O

**Ideal For Use On a Variety of Substrates:** Granite, limestone, marble and other natural stone. Glass, metal and plastics in glazing, curtain wall assembly, EIFS-to-EIFS joints, masonry, concrete, wood and other common construction substrates.

Lotus Temple, New Delhi, India, Completed in 2006.

### Example of Silicone Staining/Bleeding

Staining on polished granite. Unknown age.

### SCS9000 Silicone No Staining/Bleeding

No staining or dirt pick-up on Cold Spring Carnelian granite after four years.
